

Stalking Cancer

ONCOMOUSETM shortens the path to knowledge in carcinogenesis

ONCOMOUSETM/*ras* transgenic animal is the first *in vivo* model to contain an activated oncogene. Each OncoMouse carries the *ras* oncogene in all germ and somatic cells. This transgenic model, available commercially for the first time, predictably undergoes carcinogenesis. OncoMouse reliably develops neoplasms within months...and offers you a

shorter path to new answers about cancer. Available to researchers only from Du Pont, where better things for better living come to life.

For more information about OncoMouse and monoclonal antibodies for specifically detecting the activated *ras* oncogene protein, call 1-800-551-2121.
